

Gemini Integration Services
Innovating Green Technology

Introducing...

Hubble

 a GreenLink™ System
for apartments and condominiums

a more intelligent conservation solution

Hubble is a complete building control system that..

- benefits both building owners and tenants by harnessing the latest in Smart Grid Technology.
- **optimizes** both new installations and pre-existing systems.
- empowers you with **economic and environmental vigilance.**

Wirelessly Control ...

Thermostats	Water
Room Sensors	Gas
Indoor air quality	Solar
Humidity	Lighting

...and more.

Individual Tenant Control

When you look at a tree, it is easy to see how green it is, but it takes a professional to tell you how green you are living. Our EcoMeasure is a simple way the individual tenant can view how their utility usage is effecting the environment.

Smart Meters

Our system connects to Smart Meters allowing tenants to monitor and control their utilities instantly from anywhere in the world. Automatic reports show usage and comparisons, using a standard web browser.

Demand Response Programs

Smart Meter integration allows tenants and building owners to participate in Utility initiatives that save money. Only use what you need and reap the benefits of your conservation. Hubble makes it easy to keep track of all your savings.

Phone Control

Hubble Mobile gives a tenant instant access to your system through an internet enabled phone.
